

Wish List

As we continue to grow and improve our program, the need to grow and improve our facilities and equipment runs parallel. Fields 6 and 8 at our current location have long needed upgrades, and we've been fortunate in our first year to find support for regrading both fields, putting in a new pitching mound, and providing new balls, helmets, and face masks. We'd like to raise the bar for these fantastic girls, and would love your support to help us provide a better experience for all. Below is Northwest Softball's Wish List. Supporters of these items would receive a custom package of benefits, including but not limited to prominent logo placement at the field, top billing on our website, frequent mentions on social media and in our weekly newsletter, NWS swag, and more! Help us make Northwest Softball a premier youth sports program!

New storage shed – \$3,500. We need a larger, more secure location for our new pitching machine and all of the field equipment. This is a great opportunity for premier logo placement as the price includes a custom painted logo on the side of our shed for up to three seasons!

Jugs P50 Pitching Machine – \$800. We face some pretty awesome competition in Pony League and need to quicken our bats, though every age group would benefit from getting some swings off this machine.

Outdoor power source – \$2,600. Longtime NWLL partner BJ Electric will be putting in an external power source for our new pitching machine (as well as the jump house we rent for league parties!)

Batting cage – \$2,000. A batting cage along the fenceline will give our pitchers and hitters extra space to train, and our friends at Northwest Little League will be able to use it as well!
